EARLY CRUSADER

One-piece chest armor with ab plate, styled to resemble bone, leather, or rough-pounded metal.

COMIC CRUSADER

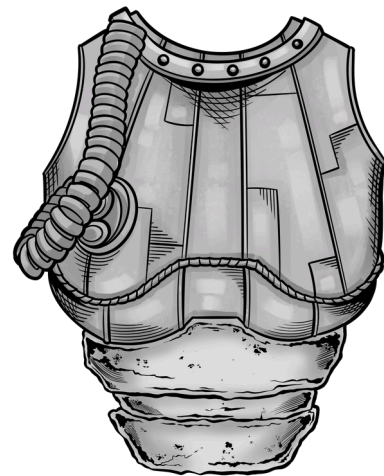

This style of chest armor offers the greatest level of customizability found in the Crusader era. It is traditionally attached with leather strapping, and the ab plate may be separate.

TECH CRUSADER

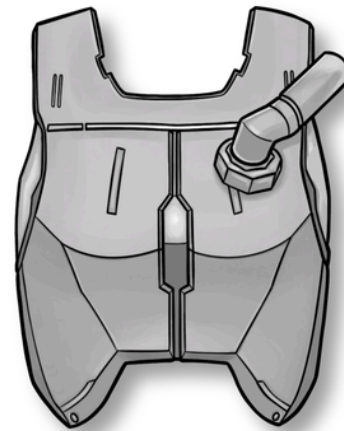

Chest armor connects to backplate over the shoulders and under arms, forming clamshell-style armor. Features include greeblies, vents, hoses, LED screens, or attachment points.

NEO CRUSADER

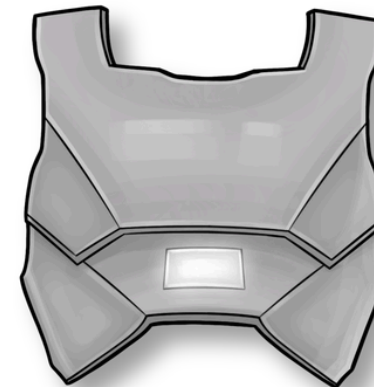

One-piece chest and ab armor closely resembling Neo-Crusader references, featuring a dramatic inward taper, pectoral separation line, two insets on the right chestplate, and an upside-down U-shaped ab line.
