

MOBILE ENGINEERS

BRIGADES

MMCC Brigades represents a distinct set of professions, with specific costume requirements known as Brigade Requirement Lists (BRLs). Members wishing to join a brigade must meet both CRL and BRL requirements to apply for recognition.

CHOOSE YOUR PATH. HONOR YOUR SKILLS. GO ABOVE AND BEYOND.

Mobile Engineers keep the war machine running. From field repairs to battlefield communications, they ensure the mission never stops. Whether rebuilding a disabled vehicle, slicing enemy systems, or forging new weapons, they provide the tech advantage every Mandalorian force needs to survive and win.

EQUIPMENT EXAMPLES

Signal Mirror

Code Cylinders

Hyrdospanner

Fusion Cutters

Data Pad

Droid Popper

Data Spike

Slicer Droid

APPROVED EXAMPLES

SPECIALTIES

MECHANIC

Mechanics are the masters of battlefield repair and improvisation. With the right tools (or sometimes just a box of scraps), they can restore damaged gear, vehicles, or weapons to fighting shape, keeping the mission alive when it matters most.

COMBAT SLICER

Combat Slicers attack systems as effectively as warriors attack flesh. Whether breaking into enemy databases, overriding defenses, or controlling machines mid-battle, their hacking skills can change the course of any mission... for the right price.

COMMS SPECIALIST

Communication Specialists control the flow of battlefield intel. They gather, analyze, and transmit vital data to keep squads connected, aware, and coordinated, often directing the tide of battle through information alone.

TECHNICIAN

Technicians specialize in finding and fixing problems others cannot. From navigation faults to malfunctioning life-support systems, they diagnose, repair, and maintain the technology that keeps Mandalorian forces operating. When equipment fails, Technicians keep the mission moving.

Keep the mission moving.

ABOVE AND BEYOND.
